

10 Reasons why you should consider ecspand Contract Management:

1. Flexible and safe investment

Based on Microsoft SharePoint, ecspand Contract Management is always right on track. Small, mid-sized and large companies and organizations equally benefit from the ideal platform for processes and applications ecspand Contract Management provides by leveraging the scalability and user friendliness of SharePoint.

2. Anytime, anywhere

Contract data is accessed via a browser, so access is flexible and imposes no restrictions in terms of time and place. No client installation is required.

3. Giving you the big picture:

ecspand Contract Management provides all data relevant to a contract at a glance: documents, notes, tasks, deadlines, etc. In addition, the contract management tool offers a simple-to-use but highly powerful meta data search function. This allows users to quickly find the information they need.

4. Proactive notification

Users are always informed about tasks or due dates, no matter where they are.

5. Sophisticated access rights configured with ease

Access rights can be assigned automatically or semi-automatically based on meta data.

6. Smart evaluations

Contractual data can be immediately evaluated by users with the aid of an application they know better than any complex business intelligence tool: Microsoft Excel.

7. Fast and affordable

ecspand Contract Management can be implemented and set up in your existing SharePoint environment easily and quickly, reducing project costs.

8. Simple, yet powerful

All products of the ecspand brand can be flexibly and easily adapted to individual needs, including new functions. This is done using standard Web technologies such as HTML, JavaScript, JQuery, .Net, etc.

9. nGUI - next Generation User Interface

The groundbreaking and unique ecspand Contract Management user interface allows users to directly benefit from the latest Web technologies.

10. SOA – simple, smart, mobile

The service-oriented architecture of ecspand ensures that various scenarios are covered, ranging from digitization, conversion, archiving and import through to interfaces to leading ERP and CRM systems (SAP, Oracle, Dynamics etc.).
