

■ ■ ■ Contract Management

Put your contracts in order.

“Contract Management provides an overview of all active contracts and their corresponding durations. Transparency is logical, cancellation periods and deadlines are constantly monitored. Another benefit: Contract Management is a complete product instead of being a simple project solution.”

“Contract Management” is one of twelve pre-configured ECM solutions offered by ecspand based on Microsoft SharePoint.

Contract Management

Put your contracts in order.

Do you really know how many contracts you have ever signed? And what costs are involved? Get yourself an overview! The browser-based solution enables gathering of, search for and administration of any contract type. The unified and inclusive illustration of all contracts provides a comprehensive view of the value of your company, your business relationships and possible effects in terms of time and finances. Also your strategic IT applications can be integrated.

Overview Contract Management

Key features for risk minimization during contract management:

- Compliance with statutory regulations
- Always homogeneous status / topicality and contract transparency
- Standardized generation of contracts and further applicable documents
- Contracts are easily found
- Avoidance of content-related / technical risks of contracts
- Protection against the loss of contracts / integral parts of the contract
- Deadlines and contract options are adhered to
- Optimized, comprehensive handling
- Transparent approval / release process
- Short lead times, automated contract monitoring
- Accounting- and audit-proof

Functionalities:

Documents / attachments (archiving)

- Filing of documents in contract dossier
- Document types (scan, Office, e-mails, etc.)
- Contract processing, versioning, and history
- Efficient audit-proof archiving

Release process / workflows

- Integration of employees working in different divisions / sites / companies into the contract generation and/or approval process by means of release work flows

ERP integration (SAP, Navision, ...)

- Currency conversion for reporting
- Integration of master data (business partners, contracts)
- Integration in accounting (payments)

Evaluations / risks

- Capture of individual risks related to a contract
- Capture of evaluations coming from the divisions / companies

Reminder and early warning system

- Capture of deadlines and reminders
- Automatic notification when certain threshold values are being reached

The image displays three overlapping screenshots of the eCSPand Contract Management software interface. The top-left screenshot shows a 'Stammdaten' (Master Data) view for a contract, including fields for 'Vertragstyp', 'Vertragspartner', 'Mandat', 'Anspruchspartner', 'Vertragsnummer', and 'Vertragsstatus'. The top-right screenshot shows a 'Meine gültigen Verträge' (My valid contracts) overview table with columns for 'Vertragsgegenstand', 'Vertragspartner', 'Verantwortlicher', 'Status', 'Vertragsbeginn', 'Vertragsende', and 'Kündigungstermin'. The bottom screenshot shows a 'Meine Aufgaben' (My tasks) overview table with columns for 'Aufgabenart', 'Fälligkeitsdatum', 'Aufgabenstatus', 'Aufgabenziel', 'Fälligkeitsdatum', 'Zugewiesen an', and 'Vertragsgegenstand'. The interface is branded with 'eCSPand your SharePoint' and includes navigation elements like 'Suchen' and 'Filter anwenden'.

Contract Management by eCSPand:
Overview of master data and activities cockpit

Contract administration	<ul style="list-style-type: none"> ■ Capture and structuring of contract-relevant data and documents ■ Contract generation and negotiation ■ Approval processes ■ Contract fulfillment ■ Surveillance of deadlines including cancellation periods ■ Definition of (internal and external) responsibilities
Contract archiving	<ul style="list-style-type: none"> ■ Audit-proof archiving of the contract-relevant data and documents ■ Creation of a contract file ■ Availability of all information needed for contract administration and monitoring
Contract monitoring	<ul style="list-style-type: none"> ■ Active risk evaluation ■ Availability of statistics of any kind ■ Contract-relevant planning possibilities ■ Surveillance of deadlines and payments ■ Finance planning ■ Reports for annual financial reports, public accountants and management
